

VILLAGE OF BREWSTER

New York

For this Putnam County community, the firm prepared a blight determination study in anticipation of preparing an urban renewal and downtown redevelopment plan and GEIS. The blight study evaluated and ranked 150 properties in the Village and concluded that four sectors in the downtown were eligible, under NYS law, for potential urban renewal designation. F&A advised that, if left unattended, the blighted properties would continue to impair and impede the economic return and growth in the area.
